

# Ali Jahangiri

Front End Developer

City	Tehran	Email	jahangiri.dev@gmail.com
Phone	+989392127192	Education	software engineering at university of karaj (OCT 2021 - Present)

## Work Experience

Dec 2020 Tehran	<b><a href="#">Nobino</a> and Nobino cms</b> Working on a large multi-permission cms for VOD service using pure js in spring boot MVC and also created user interface in nobino end user app with help of next and redux.
Apr 2021 Karaj	<b><a href="#">Karbala</a></b> The first and only platform for app production in the insurance industry and its online production in Iran. As the leader of the frontend team, I have been instrumental in building new user experience, maintenance, and refactoring. Also trained and experienced in the production of ultra-dynamic products that can instantly change the way it is displayed and operated.
Jul 2021 Karaj	<b><a href="#">Karbala Native</a></b> Design, create and develop native version of karbala cms in enterprise scale with on-demand dynamic styling and behavioral logic. Every user can create their own app with customizable layout and component with completely different inside logic with help of react native, expo and custom state management library.
Sep 2021 Karaj	<b><a href="#">Target*</a></b> User habits and daily routine scheduler in simple way with real-time data. a way to manage personal tasks with fully drag-drop sticky block.
Dec 2021 Karaj	<b><a href="#">Rafta</a></b> (closed-soruce - under develop) Founder and owner, responsible for the idea generation and production of the business canvas and model. Also implemented the creation of a client js SDK using typescript to fully collect and send the user behavior and journey in live-term.

## Skills

HTML5 CSS3 Sass	Styled components
Enterprise Javascript ES6-7-8	Jss
DOM scripting	Typescript
Ant Design	Familiar with Firebase
Bootstrap 4	Redux (Toolkit - Persist - Middleware)
React	Next.js, SSR and SSG
React Hooks and Context	JSON -REST API- data Fetching
React Router	Familiar with unit and integration test
React Native with Expo	Webpack - babel - npm
	Git

## Mindset and Structure

React patterns	Functional programming concept and OOP in js
Flux pattern	SMACSS , 7-1 , BEM
Code splitting and chunking	Write React Custom Hook for Reusing Logic
Familiar with UI UX principles	Expert in Dynamic Structures , Flows and Generators in front end architecture
Familiar with Design Systems and developing Single Source of truth in design	

## Article
